## **Go Green! with Envy** **The latest from the house of Crayon**

New Delhi, India: After the successful launch of its flagship model, Zeez, Crayon Motors today announced the launch of its latest product, Envy. Envy follows the company's commitment of offering best in class products. While offering best in class space, Envy ensures easy manoeuvrability to get through those tricky road conditions. Envy is also available with Lithium-Ion batteries.

"Along with offering a high quality product range, we also offer our customers ready EMI solutions from over 15 Banks and NBFCs.", says Rahul Jain, Director, Crayon Motors. He adds, "Over the next year, we are looking at adding another 100 dealers to our growing dealer network."

Some key features of Envy are:

- **Best in class mileage**
- **Keyless Ignition**
- **Alloy Wheels**
- **Disk Brakes**
- **USB Charging**

With the commencement of deliveries, under the 'Plant a Tree' initiative, where a tree is planted for every scooter sold, the company expects to plant over 1000 trees over the next four months. More details are available on [www.crayonmotors.in](http://www.crayonmotors.in)

About Crayon Motors: Crayon Motors is a vision of management with more than a decade of experience in the field of electric mobility. The company is looking at creating a positive impact on the environment by introducing cost-effective, low maintenance scooters for its customers. Crayon is working towards introducing a high-speed scooter in the near future.

Regards,

Mayank Jain

Director

Crayon Motors Private Limited
